EDUCATION

- | | |
|---|--------------------------------|
| 1. Sardar Patel Institute of Technology, Mumbai
B Tech Computer Engineering | 2023-2027
CGPA: 8.33/10 |
| 2. G.D.Sawant Arts,Science and Commerce College,Nashik
HSC,Maharashtra Board | 2021-2023
Percentage:86.33% |
| 3. Horizon Academy,Nashik
SSC,Maharashtra Board | 2021
Percentage:89.80% |

SKILLS

Languages : C, C++, C#,Java , Python ,R.

Development: Frontend- React, Bootstrap **Backend-** tkinter,Flask,Node js.

APIs & Communication: FastAPI ,Postman , SMTP, Twilio.

Databases and Tools: MySQL, JSON, CSV, GitHub, Canva, Excel.

Web Scraping and Automation : Request, Beautiful Soup, Selenium,n8n,Zapier,Airtable.

Data Science and Machine Learning: Statistics, Pandas, NumPy, SciPy, TensorFlow, Keras, Deep Learning ,Jupyter.

Data Visualization: Matplotlib, Seaborn, Power BI.

LLMs & Agent Development: Azure , OpenAI ,RAG, n8n-based automation agents.

EXPERIENCE

- 1.Data Analyst Intern, Strivepoint Capital (New York) | [Project](#)** June 2025- Aug 2025
 - Built AutoStockInsight,using n8n and Azure LLM to automate tweet scraping and generate 100-word summaries.
 - Supported investment research by building dashboards, automating and cleaning financial data, and developing visualizations, factor models, and signals for stock-level analysis.
- 2. IIC Startup Coordinator, IIC SPIT** Feb 2025 - Present
 - Manage and coordinate institutional events for each quarter while preparing structured event reports..

PROJECTS:

- 1. AI DIY Project Generator & Evaluator | Flask, LLMs (OpenRouter, Gemini), Whisper, ScrapingDog**
 - Designed an intelligent recruitment platform that matches resumes to job descriptions using NLP, semantic similarity scoring, and BERT-based contextual embeddings with spaCy preprocessing and cosine similarity for ranking.
 - Enabled multi-resume uploads, job role classification, and match score generation through a fast, scalable FastAPI backend and a responsive React frontend.
- 2. 911 EMERGENCY CALL PREDICTION| Python: Pandas, scikit-learn, Folium, Power BI, Streamlit | [GitHub](#)**
 - Cleaned 5 years of 911 call data (2015–2020) and performed detailed EDA using PowerBI to identify patterns in emergency types and locations.
 - Used clustering (KL Divergence for call_type: 0.0001)and Folium-based geospatial modeling to predict future emergency hotspots. Developed a Streamlit app to accept past data and emergencies, generating a PDF report and interactive map for future emergencies.
- 3.STOCK MARKET SENTIMENT ANALYSIS |Python: Selenium, VADER, Power BI | [GitHub](#)**
 - Automated a Selenium-based web scraping to collect live tweets on 10+ stock tickers, enabling real-time market sentiment tracking and analysis of 320+ tweets.
 - Applied VADER sentiment analysis to classify tweets into positive (51.56%), neutral (36.25%), and negative (12.19%), and developed Power BI dashboards to visualize sentiment trends, distribution, and keyword analysis.

ACHIEVEMENTS & CERTIFICATIONS

- 1.DATATHON 2025 Winner ,ARTIMAS ,Pune([Certification Link](#))**
 - Solved a multi-class text classification task using TF-IDF, XGBoost, and an SGDClassifier pipeline, applying NLP techniques to build a scalable and efficient solution.
- 2.The Data Science Course: Complete Data Science Bootcamp 2025([Certification Link](#))**
- 3.100 Days of Code: The Complete Python Pro Bootcamp:([Certification Link](#))**
