📍 Mumbai, India 📞 +91 7038711591 ✉️ sahil160506@gmail.com
🌐 linkedin.com/sahil-gupta 🏠 github.com/Sahil-Gupta-16

EDUCATION

Sardar Patel Institute Of Technology, University Of Mumbai

2023 – 2027 (Expected)

B.Tech in Computer Engineering

Mumbai, India

Relevant Coursework: OOPS, DBMS, CN, COA, Operating Systems

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, C++

AI/ML: Python, TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas

DevOps & Tools: Docker, Git, Linux, CI/CD

Frontend: React, Next.js, HTML, CSS, Javascript

Backend: Node.js, Flask, FastAPI

App & Design: React Native, Figma

Data & Visualization: SQL, Redis, Power BI

PROJECTS

Vegha - Smart AI Traffic Control 🏠

Mar 2025 - Oct 2025

Python, Deep RL, TensorFlow Lite, C++

- Designed and deployed a real-time traffic light controller system.
- Optimized multi-agent coordination through TensorFlow Lite-based on-device inference simulations.
- Reduced hardware costs significantly compared to traditional systems while improving overall city traffic flow.

CivicConnect – AI-Powered Smart Civic Issue Reporting System 🏠

Sep 2025

React, Flask, PostgreSQL + PostGIS, Redis, Python

- Enabled citizens to report civic issues instantly, reducing delays and improving municipal responsiveness.
- Automated issue categorization and routing, ensuring accurate departmental assignment and faster resolution.
- Provided real-time tracking and analytics, enhancing transparency, accountability, and informed decision-making for municipal authorities.

Deepfake Detection System – Multi-Model AI Video Verification Platform 🏠

Oct 2025 - Nov 2025

Python, ML, React, JavaScript, Redis

- Developed a robust AI-based system for detecting manipulated or AI-generated videos through automated frame-level analysis.
- Implemented a 5-model ensemble deepfake detection pipeline (Xception, ResNet-50, EfficientNet, Vision Transformer, LSTM) using frame-level analysis to enhance detection robustness.
- Designed a multi-channel distribution architecture including a web upload portal, Chrome browser extension, and a centralized dashboard for monitoring flagged content.

ACHIEVEMENTS

- Winner, Innovik 5.0 Hackathon** – 1st place among 200+ teams at Vikrant Group of Institutions, Indore.
- Runner-Up, MUJ HackX 3.0** – 2nd place among 330+ teams nationwide for AI Deepfake Detection System at MIT Jaipur.
- 2nd Runner-Up, CodeSlayer 2k25** – 3rd place among 10,000+ participants for Smart AI Traffic Control System at NIT Delhi.

EXTRA-CURRICULAR ACTIVITIES

- E-Cell SPIT Acquisition Arena** – 1st Runner-up in entrepreneurial competition.

LEADERSHIP

- Core Member, Sports Committee (SPIT)**

Sep 2024 – May 2025

Led planning and execution of major sports events, increasing participation and coordination.
